POLYMER GROUP LTD

ENDURAGRIP C HIGH FRICTION SURFACING

HIGH FRICTION LOADING DOCK & PEDESTRIAN NON-SLIP SURFACING

PROJECTS: Commercial and industrial loading bays

Owner: Laminex Rotorua
Fonterra Te Rapa
Bunnings

Project Specification:

Enduragrip C High Friction Surfacing & Sealer over concrete
Enduragrip C
Glass or mineral aggregate
Enduragrip Sealer

Issue:

In wet conditions fork hoists were sliding on the concrete whilst loading and unloading trucks and rail wagons, causing damage and creating a significant safety hazard.

Description:

Enduragrip C with an aggregate dressing provides a durable, industrial or decorative trafficable surface over properly prepared concrete and encompasses excellent skid resistance in both wet and dry weather.

Enduragrip C is a rapid cure, high build epoxy resin designed to provide a heavy duty trafficable protective and abrasion resistant coating over properly prepared concrete.

Enduragrip C with a decorative aggregate dressing is recommended for slip prevention for pedestrians in wet and icy winter weather and also provides for pedestrian demarcation.

Please note that over asphalt surfaces Enduragrip PU is recommended.

*Chemically Engineered Solutions for
Extreme Environments*

**Visit our new website
www.polymer.co.nz**

Polymer Group Ltd is an applied technology company comprising a team of industrial chemists, engineers and qualified coatings inspectors which has served New Zealand industry for over 30 years.

Property Asset Protection is the company's major focus, providing proven, durable solutions for the **protection of structural steel, concrete and timber** structures.

Wear resistant, Anti-corrosive Protection Systems are engineered to provide optimum performance and extended maintenance intervals.

Surface Coating Technology Advances offer multiple choices to the asset manager and civil engineer who is seeking long term solutions and minimum downtime, but not always able to provide an optimum application time frame.

Maintenance Assessments and Specification Options give the client the opportunity to inspect and discuss the asset with experienced personnel, taking into consideration the exposure environment, past performance of any existing protection systems, available downtime and other constraining influences.

Sole Responsibility Material Supply and Application Contracts provide the client with further reassurance that their protection/maintenance systems are supplied and installed by a Quality Assured, company.
